DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-19^{and 22-25} drawn to a method of determining susceptibility of developing a chronic ulcer, severity of a chronic ulcer, or healing response in a chronic ulcer by detecting a polymorphism in a gene that encodes an inflammatory cytokine.

Group II, claim(s) 20-21, drawn to kits.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the kits of group II comprise primers specific to genes that were known in the art at the time of the invention. Further, the primers of the kits of group II appear to be specific for the wildtype gene of an inflammatory cytokine and do not necessarily encompass primers specific to variants of these genes, thus the kits can be used in methods of detecting the wildtype gene and are not required to practice the methods encompassing detecting polymorphisms of inflammatory cytokines of Group I.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
